

Creating Roofing Solutions

EZ GLAZE™

Polycarbonate Sheets with a Glass-Like Appearance

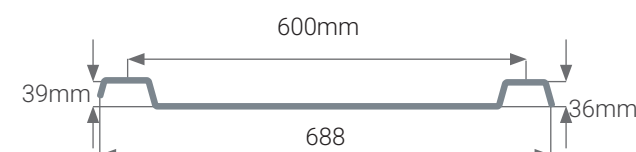

EZ Glaze smart layout simplifies installation and fastening, while providing high load capacity and durability. The 3 mm thick polycarbonate sheets fit directly over rafters without supporting purlins.

EZ Glaze is an attractive and user-friendly solution for patio roofs. Enjoy natural daylight and comfort with outstanding design and finish. EZ Glaze offers easy, safe and fast installation, extra strength and hail-resistance, durability and UV protection.

Main Benefits

- Superior strength & durability
- Lightweight & easy to install
- Fits directly over rafters
- Blocks 99.9% of harmful UV radiation
- Hail & impact resistant
- High wind and snow load resistance
- Minimal maintenance
- Glass appearance

EZ Glaze™ Beehive

High Impact Polycarbonate Sheet with a prismatic surface

EZ Glaze™ Beehive Strong, Durable & Stylish.

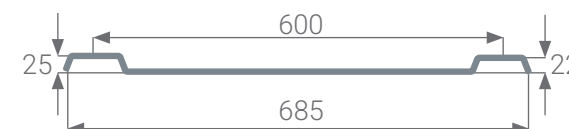

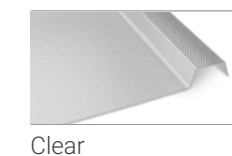

The EZ Glaze™ Beehive 2.8 mm sheet with unique honeycomb texture is designed for pergolas, patios, and outdoor structures.

It offers exceptional weather and hail resistance, ensuring long-lasting comfort. Easy, cost-effective installation directly on rafters (and purlins optional installation) delivers a modern, elegant roofing solution with natural light, minimal maintenance, and maximum convenience.

Main Benefits

- Easy to install
- Rafter Installation
- Durable Against Impact
- Optimized Light & Shade Balance
- Superior strength & durability
- UV Protection
- High wind and snow load resistance
- Minimal maintenance
- Improved absorption of rain noise

SUNLITE®

Multiwall Polycarbonate Sheet

Rigid-structured sheets with a variety of light transmission options & excellent thermal insulation.

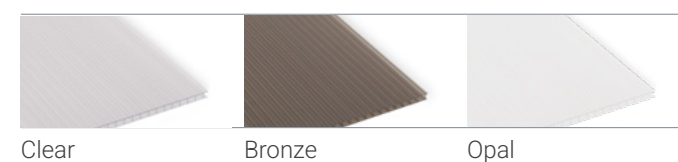

SUNLITE® is a flat, multiwall Polycarbonate sheet that combines the strength of Polycarbonate and superior insulation due to its cellular structure. The multiwall structure creates insulating air spaces (cells) that help reduce thermal (heat) energy penetration, resulting in a cooler area in the summer and a warmer area in the colder months.

SUNLITE® in design is the choice for those looking to create a look other than traditional corrugated. With a seamless finish, SUNLITE® uses a joining system which allows the roof a clean look – hiding most fixing points.

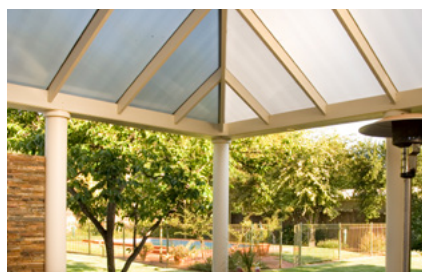

Main Benefits

- Lightweight & easy to install
- Hail & impact resistant
- Blocks 99.9% of harmful UV radiation
- Excellent structural durability
- High wind and snow load resistance
- Excellent Light Transmission
- High fire rating
- High thermal insulation

SUNGLAZE®

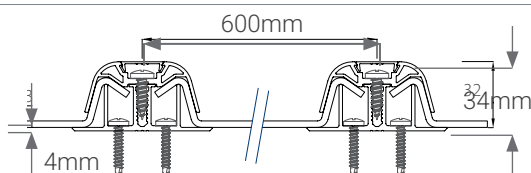

Polycarbonate Standing Seam Architectural System

Standing-seam glass-like panel and glazing system that offers smart design, elegant appearance & sustainable performance.

SUNGLAZE is an architecturally designed polycarbonate glazing system – ideal for home owners looking for that traditional glass look. Using a watertight aluminium joiner system – SUNGLAZE reflects a clean elegant appearance that is easy to install, that would enhance any property. SUNGLAZE offers a solid flat surface appearance, maximising the clearer view most homeowners are trying to achieve.

Main Benefits

- Glass alike appearance
- UV protected from one side
- Expansion free system with concealed fixings
- Increased insulation against solar heat & sun glare
- Available in wide colour range including SolarSmart™ Breeze
- 99.99% UV Protection
- Watertight joining system
- Available in 4mm thick, 600mm wide
- Superior hail resistance

SUNPAL®

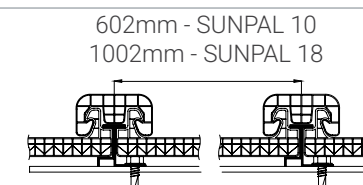

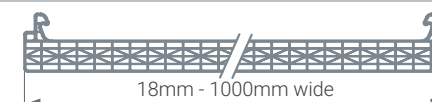

Multiwall Polycarbonate Standing Seam Architectural System

Standing-seam multicell panel and glazing system that adapts to any project.

SUNPAL is an advanced Multiwall polycarbonate Panel System that combines proven design, light transmission, thermal insulation and strength. It offers a lightweight, leak-proof 'Snap in' design that withstands very high loads and accommodates expansion and contraction. The system uses a unique joiner which in turn snap over two sheets and provide a watertight seal. Used as a roof or fixed vertically as a decorative clad wall SUNPAL offers design with a very practical sense.

Main Benefits

- 99.99% UV Protection
- Greater hail resistance
- Increased thermal Insulation with multilayers
- Wide colour range including SolarSmart™ including diffuser and matte surface finish
- Expansion free system with concealed fixings
- UV protected from both sides
- Great option to modernise existing structures
- Available in 10mm/600mm wide, and 18mm/1000mm wide

Handling and Storage

- Read the technical manual before installation (available from your supplier or at www.palram.com/UK).
- Use only Palram-approved accessories.
- Remove protective film immediately after installation.
- Prolonged exposure to sun or heat may cause film to bond irreversibly to panel.
- Do not walk on panels. Use crawling boards supported by the roofing purlins to avoid damage to panels and to ensure safety.
- Clean only with non abrasive, warm water and neutral PH soap.
- Large areas may be washed by high-pressure water jet, possibly adding a mild compatible detergent.

Product Warranty

Full warranty terms and conditions available from: www.palram.com/uk

* Warranties only apply to installations and maintenance that follow Palram installation instructions and specifications.

Safety

Safety comes first

Do not step directly on the sheets between the purlins!

When installing polycarbonate or doing maintenance work, always consider the sheet to be unfit to support a person's weight. Always use stepping ladders or crawling boards, supported by minimum three roof structural elements, when working on a glazed roof of any kind.
