

Underground Drainage Systems

Domestic Channel Drainage

110mm Domestic Channel Drainage

FloDrain can be applied around many domestic areas where surface water collects including:

- Driveways (light vehicles only) and pathways.
- Gardens and water features.
- Patios and conservatories.
- Retaining walls.
- Swimming pools and sports areas

System Features

- CE marked in accordance with the Construction Products Register.
- Slip resistant and heel guard.
- Concave design and deeper outlet for improved flow.
- A15 Load rating - Tested to BS EN 1433:2002.
- No locking bars required.
- Grate is easily removed with a flat head screwdriver.
- Spacer now available to connect the quad connector to the threshold to enable access in the event of a blockage.
- Threshold for use at front of a door, allowing the installation to conform to Part M of the Building Regulations.
- Sump trap with integrated basket to collect debris before it enters the system.
