

FloPlast

FloFit+

**Hot & Cold
Plumbing Systems**

FloFit+

For a faster, easier and more cost effective installation.

The all-new flexible push-fit hot and cold plumbing system.

FloFit+ is a flexible and fully demountable push-fit plumbing system suitable for all domestic and small commercial hot & cold water installations, including central heating systems for both pressurised (unvented) and combi (vented) systems. FloFit+ enables the installer to undertake a faster, easier and more cost effective installation. Independent testing confirms time savings of up to 40% compared with traditional plumbing materials.

FloFit+ has a wide range of fittings in 10mm, 15mm, 22mm and 28mm sizes, which are both WRAS approved for use with plastic and/or copper pipe, and Kitemarked to BS 7291 Parts 1, 2 & 3.

System Benefits

50 Year Guarantee

An unrivalled 50-year product guarantee is offered on all FloFit+ fittings and pipe.

BSI Accreditation

FloFit+ fittings are Kitemarked to BS 7291 Parts 1, 2 & 3, including 'Class S' (KM602628).

WRAS Approved

Fully WRAS certified under approval number 2009549.

Made In The UK

All FloFit+ fittings are manufactured at FloPlast's Kent, UK production facility.

Lightweight Design

Easy to handle and work with whilst remaining incredibly strong and durable.

Superior White Finish

FloFit+ fittings and pipe are produced with a maintenance free white finish.

FloFit+ fittings are **fully demountable** and available with **coloured collet clips** for easy identification.

22 x 22 x 300mm	FH22

Chrome ISO Valve

Size	Code
15 x 15mm	FV15

FloFit+ Pipe

FloFit+ compatible pipe is available in either Polybutylene (PB) or PEX and benefits from full BS7291-Class S and WRAS approvals. This provides specifiers and installers full confidence in the quality and reliability of the range. Like the FloFit+ fittings, the pipe also benefits from an unbeatable **50 year guarantee**.

All pipe has been approved for hot and cold water distribution systems, underfloor heating systems and central/plumbing heating systems.

Easy-Lay Pipe is more flexible than other pipes allowing you to manoeuvre the pipe into awkward spaces with complete ease. It's quick and easy to uncoil and the flexible material makes cabling through joists a simple task.

PEX Pipe is tough, dependable and flexible, and remains amazingly reliable & incredibly efficient.

Regardless of material, it is critical that pipe inserts are used when installing the range. See page 6.

Pipe Layering Information

- 1 PB/PEX inner pipe layer.
- 2 An adhesive layer bonding the inner pipe layer to the oxygen barrier.
- 3 Ethylene vinyl alcohol copolymer (EVOH) oxygen barrier layer.
- 4 An adhesive layer bonding the outer pipe layer to the oxygen barrier.
- 5 PB/PEX outer pipe layer.

Easy-Lay PB Pipe

Size	Code
10mm x 25m Coil	123401
10mm x 50m Coil	123402
10mm x 100m Coil	123403
15mm x 3m Length	124400
15mm x 25m Coil	124401

FloFit+ FSDU

Size	Code
710 x 1770 x 540mm	908018

Assembly

1 When making a joint with FloFit+, ensure that the pipe has been cut square and is free from burrs, scratches and sharp edges.
FloPlast recommend that all pipes are cut with pipe cutters and not hacksaws.
Do not use damaged or scratched pipes as this could cause a leak.

2 Before assembling the joint, ensure that the appropriate pipe insert has been inserted into the pipe. (Figure 1)
All joints with either FloFit+ fitting or compression fittings must include the correct pipe insert.

3 Mark the pipe to the required insert depth (see table below) including the correct insert.
Push the pipe into the fitting to the stop point, the insert depth line (previously marked) should not be visible. (Figure 2 & 3).
Check the assembly to ensure that the pipe is fully locked by pulling the pipe away from the fitting.

Copper Pipe Only – Before installing the pipe, remove the collet clip and then ensure that the collet is pushed into the body of the fitting. Install the pipe ensuring that it is fully inserted into the fitting. Pull the collet out and secure the joint sufficiently to enable the collet clip to be re-fitted. This ensures that the joint is locked.

Not to be used in conjunction with Plated Copper Pipe.

4 To dismantle FloFit+ fittings, remove the collet clip, loosen the cap, pull the pipe back slightly and push the collet face towards the body of the fitting, then pull the pipe out of the socket. (Figure 4)

No tools are required to dismantle FloFit+ fittings.

Pipe Size	Insertion Depth
10mm	23mm
15mm	30mm
22mm	37mm
28mm	45mm

NOTE:
A Pipe Insert is required when using a Stem Elbow or Stem Reducer.

Support

Technical Brochure

Full product and technical information alongside operating parameters and application guidance.

Installation Guide

Simple to understand installation guide for all applications including copper pipe and brass compression fittings.

Marketing Website

Consumer friendly website with installation videos, additional imagery and FAQ's.
